

Specialty Parts and Electronic Components

Rev.: 000 11.05.11

Company Profile

Located in Texas, S.P.E.C. is a stocking distributor of electronic components from leading edge technology to hard to find, obsolete, and allocated products. As an independent distributor, we have no obligation to carry any particular manufacture, enabling us to provide a more diverse line of products with flexible pricing.

As we have grown over the years, we have expanded our customer base to include many companies around the globe. For years we have built strong customer relationships. Immediate quotes and quick deliveries are what our customers have come to rely on.

We are constantly adding product lines to our inventory, which is currently over 93,000 line items. With this growth in inventory, we were forced to expand in 2003 to our new 25,000-sq. ft. warehouse. Even with the expansion, we have still maintained our small business atmosphere and attitude.

Est. 1988

Services Provided

Stocking Distributor
Product Procurement
BGA Repair
Retinning
Tape and Reel
Reconditioning of Leads

Moisture Removal
Dry Packing
Parts Removal
EPROM Erasing
Vacuum Sealing
